# User's Guide and Codebook for the ANES 2016 Time Series Study

**ANES 2016 Time Series Data User's Brief Guide**
*Initial Release*
*March 31, 2017*

This is a brief guide to the American National Election Studies (ANES) 2016 Time Series study, to accompany the initial release of the data in March 2017.

The ANES 2016 Time Series is a continuation of the series of election studies conducted by the ANES since 1948 to support analysis of public opinion and voting behavior in U.S. presidential elections. This year's study features a dual-mode design with both traditional face-to-face interviewing (n=1,181) and surveys conducted on the Internet (n=3,090), and a total sample size of 4,271.

**Initial Release**

This data release in March 2017 is the initial public release of the data. The file serves analysts who want to start working with the data as soon as possible. Data from an initial release differ from final ANES data releases in several important ways. Quality control review, summary variables, and documentation are abbreviated. Future releases of the data will provide expanded documentation and additional data, including interviewer characteristics, interviewer observations, and many administrative variables such as data on household selection, question timing, dwelling unit observations, and candidate-election information. Numerical coding of most non-confidential open-ended questions will be included in future releases as they are completed. Future releases may also include error corrections and edits to improve accuracy or usability. If you find errors or have comments or questions about the data, please communicate with ANES staff by writing to anes@electionstudies.org

**Sample Design and Respondent Recruitment**

The study has two independently drawn probability samples that describe approximately the same population. The target population for the face-to-face mode was 222.6 million U.S. citizens age 18 or older living in the 48 contiguous states of the USA or the District of Columbia, and the target population for the Internet mode was 224.1 million U.S. citizens age 18 or older living in the 50 US states or the District of Columbia. In both modes, the sampling frame was lists of residential addresses where mail is delivered, and to be eligible to participate, a respondent had to reside at the sampled address and be a U.S. citizen age 18 or older at the time of recruitment.

*Face-to-face face mode*. The sample for in-person interviews was a multi-stage stratified cluster sample. This is similar in general design but different in details from past designs of ANES Time Series studies. Sixty primary sampling units (PSUs) were selected from across the 48 contiguous states and Washington DC. The PSUs were counties, or combinations of counties to form a minimum population of 50,000, or, in the case of Los Angeles County, half-counties (i.e. L.A. County was divided into two PSUs due to its large size). Counties were stratified by Census region, prevalence of poverty and members of minority groups, and population size, and then selected at random with probability proportional to the number of adult citizens, except that Cook County, IL, Harris County, TX, Maricopa County, AZ, and both halves of Los Angeles, CA, were selected with certainty.

Within each PSU, four smaller areas were drawn (secondary sampling units, which were Census Block Groups), and households were selected at random from within these areas from the US Postal Service's computerized delivery sequence file (DSF). An advance letter was sent to each selected address that

included a study brochure and $5 in cash, after which an interviewer visited the address to complete a screening interview to randomly select one person to be interviewed from among the adult U.S. citizens living there. Those interviewed were given $25 or $50 during the initial phase of the field period (with $50 offered in PSUs where predicted response propensity was low and $25 offered elsewhere), escalating to $100 after initial non-response.

During the last two weeks of data collection, subsampling was performed in which half of the remaining eligible cases from the face-to-face were dropped from the study to focus field efforts on the other half. The weights account for this subsampling by up-weighting the cases retained at this stage.

*Internet mode*. The sample for the Internet mode was a random draw from the DSF (excluding "drop point" addresses), with all included residential addresses across the 50 states and Washington DC having equal probability of selection. Selected addresses were sent a series of letters to recruit one household member to go online to complete a survey. The invitation letter included $20 in cash and promised $40 for completing a survey online (later escalated to $80 for initial non-respondents). This online survey included a screening instrument to randomly select one person from among the adult U.S. citizens living at the address to complete the ANES questionnaire online and receive $40 or $80.

*Mode sample differences*. The face-to-face component of the study does not include respondents from Alaska or Hawaii; the Internet component does. This is the main substantive design difference in eligibility and coverage for the two modes and for most analytic purposes it is probably ignorable because the combined population of Alaska and Hawaii is less than 1 percent of the study population.

**Data Collection**

*Field dates*. The study interviewed respondents in a pre-election survey between September 7 and November 7, 2016. Election day was November 8. The study re-interviewed as many as possible of the same respondents in a post-election survey between November 9 and January 8, 2017.

*Locations*. In-person interviews were normally conducted in the respondent's homes, but were allowed to be conducted at any location that was convenient for the respondent. Internet questionnaires could be completed anywhere the respondent had access to the Internet, on a computer or on a mobile device.

*Modes of administration*. In-person interviews were conducted by trained interviewers using computer-assisted personal interviewing (CAPI) software on laptop computers. During a portion of the in-person interview, the respondent answered certain sensitive questions on the laptop computer directly, without the interviewer's participation (known as computer assisted self-interviewing). Respondents were only eligible to compete the survey in the mode for which they were sampled; no one sampled for the Internet study was interviewed by a live interviewer, and no one sampled for the face-to-face interview completed the study online.

*Interview length*. The pre-election and post-election questionnaires were designed for a median administration time of approximately 80 minutes each, not counting screening procedures.

*Languages*. Interviews in both modes were conducted in English or Spanish.

**Response Rates**

The response rate, using the American Association for Public Opinion Research (AAPOR) formula for the minimum response rate (known as AAPOR Response Rate 1) on the pre-election interview, was 50 percent for the face-to-face component and 44 percent for the Internet component. The response rate for the face-to-face component is weighted to account for subsampling during data collection; due to subsampling for the face to face mode, the unweighted response rate would not be meaningful. The re-interview rate on the post-election survey was 90 percent for the face-to-face component and 84 percent for the Internet component.

Pre-election interviews were considered sufficiently complete to be counted as completions for weighting and for calculation of the response rate when the survey was administered through the last item of the demographic section "DEM3."  There were a 4,271 pre-election interviews.

**Restricted Data Access**

Some variables, including date of birth, the respondent's ZIP code, and answers to open-ended questions are coded "-3. Restricted access" on the public use dataset. Data for many of these variables will be forthcoming and available through a Restricted Data Access (RDA) agreement. See the ANES website for more information. Redacted texts for non-confidential open-ends will be made available as the redactions are completed. Redacted open-ends will be available for download from the ANES 2016 Time Series study page.

**Data Analysis, Weights, and Variance Estimation**

The data can be analyzed using the combined dual-mode sample, or using the face-to-face sample alone, or using the Internet sample alone. In the combined sample, the larger number of Internet sample cases makes that mode dominate the estimates by a ratio of about 3:1.

Analysis should be weighted to accurately represent the population. Sampling error calculations should account for the complex sample design and the effects of weighting on variance.

*Weights*

To analyze the complete dataset (both web and face-to-face modes) using variables from the post-election survey only or from both the pre-election and post-election questionnaires, use the weight V160102. For analysis of the complete dataset using only the pre-election questionnaire data, use the weight V160101.

The table below indicates the weight variable to use for different types of analysis.

| *Weight* | *Use for analysis of the…* |
| --- | --- |
| V160102 | full sample using post-election survey only or both pre and post |
| V160101 | full sample using pre-election survey data only |
| V160102f | face-to-face mode alone, using the post-election survey or both pre and post |
| V160101f | face-to-face mode alone, using pre-election survey data only |
| V160102w | Internet mode alone, using data from both pre- and post-election or post alone |
| V160101w | Internet mode alone, using data from only the pre-election survey |

*Sampling errors and significance testing*

The study is not a simple random sample, so statistical procedures for complex sample designs must be used to obtain correct estimates of sampling errors and correct indications of statistical significance. Statistical software such as Stata, *R* with a survey analysis package, or SPSS with the Complex Samples package can perform a Taylor Series calculation of sampling errors when provided with the appropriate strata and cluster variables. In Stata, the command to set up this type of analysis is as follows:

```
svyset [pweight=WEIGHT], strata(STRATA) psu(CLUSTER)
```

In the code example above, WEIGHT would be replaced with the correct weight for the type of analysis being performed (as indicated in the previous section on weighting). STRATA and CLUSTER would be replaced with the variables for the corresponding analysis as indicated below.

| *Variable* | *Definition* |
|---|---|
| V160201 | Stratum – Full sample |
| V160201f | Stratum – Face-to-face sample |
| V160201w | Stratum – Web sample |
| V160202 | Variance PSU – full sample |
| V160202f | Variance PSU – Face-to-face sample |
| V160202w | Variance PSU – Web sample |

For example, the code to set up Stata for an analysis of the full sample that includes one or more variables from the post-election survey is as follows:

```
svyset [pweight=V160102], strata(V160201) psu(V160202)
```

For more information about weighted analysis of ANES data, see DeBell, *How to Analyze ANES Survey Data*: http://www.electionstudies.org/Library/papers/nes012492.pdf

## V161025   Numeric    PRE: FTF ONLY: IWR CHECKPOINT: have correct Pre ballot card

Questionnaire:  PREVOTE_CKBCARD

*IF MODE IS FTF:*
*IF HAS NOT REFUSED TO INDICATE REGISTRATION STATUS:*
*IF R IS IS REGISTERED IN COUNTY OF CURRENT ADDRESS OR IF R IS NOT REGISTERED:*
*IF PRELOAD CANDIDATE NAMES ARE NOT ALL MISSING FOR HOUSE, SENATE, OR GOVERNOR /*
*IF PRELOAD CANDIDATE NAMES ARE ALL MISSING FOR HOUSE, SENATE, OR GOVERNOR :*

*CONGRESSIONAL DISTRICT IS:  [PRELOAD: sample state] [PRELOAD: sample district].*
*ASSIGNED BALLOT COLOR IS: [YELLOW/GREEN].*
*PLEASE DESCRIBE WHETHER YOU HAVE THE CORRECT BALLOT CARD FOR THE RESPONDENT:*
*[-- NO BALLOT CARD  -- /  ]*

'Yellow' ballot card assignment indicated that names of Democratic
candidates were included before names of Republican candidate names
for vote section questions that list candidate names and, in face-to-face
mode, for the order of names listed on the Ballot Cards.
'Green' was assigned for display of Republican candidate
names first.
Ballot card use was not intended for face-to-face respondents when the
respondent was not registered at the sample address or the county of
sample address, or when names of candidates running for the U.S. House,
U.S. Senate or Governor were not preloaded for candidates who were
registered at the sample address or county of sample address.

## V161455   Numeric   PRE FTF CASI/WEB: Mention: Website Business Insider (businessinsider.com)

Questionnaire: MEDSRC_WEBSITES

*IF R HEARD ABOUT PRES CAMPAIGN ON  INTERNET SITE(S), CHAT ROOM(S), OR BLOG(S):*

*Which of the following websites do you visit regularly?*
*Please check any that you visit at least once a month.*

*(Mark all that apply)*

The top 15 online news websites were selected as they were specifically
identified in the Pew Research Center ranking in 2015, which in turn
was based on ComScore data. Excluded were gossip (Elite Daily) and sports
(bleacherreport.com) sites. Only specific websites were named, not 'entities'
('Yahoo! ABC'), but included were sites representing Pew-listed 'entities'
that were listed highly on Alexa (Yahoo News and ABC News). A 2016 analysis was not available at the
time of the 2016 Time Series study.

## V162033   Numeric   POST: FTF ONLY: IWR CHECKPOINT: have correct Post ballot card

Questionnaire:  POSTVOTE_CKBCARD

*IF MODE IS FTF:*
*IF R DID NOT REPORT IN THE PRE THAT R ALREADY VOTED:*
*IF HAS NOT REFUSED TO INDICATE REGISTRATION STATUS:*
*IF R IS REGISTERED IN COUNTY OF CURRENT ADDRESS OR IF R IS NOT REGISTERED:*

*CONGRESSIONAL DISTRICT IS:  [PRELOAD: sample state] [PRELOAD: sample district].*
*ASSIGNED BALLOT COLOR IS: [YELLOW/GREEN].*
*PLEASE DESCRIBE WHETHER YOU HAVE THE CORRECT BALLOT CARD FOR THE RESPONDENT:*
*[-- NO BALLOT CARD  -- /   ]*

'Yellow' ballot card assignment indicated that names of Democratic
candidates were included before names of Republican candidate names
for vote section questions that list candidate names and, in face-to-face
mode, for the order of names listed on the Ballot Cards.
'Green' was assigned for display of Republican candidate
names first.
Ballot card use was not intended for face-to-face respondents when the
respondent was not registered at the sample address or the county of
sample address, or when names of candidates running for the U.S. House,
U.S. Senate or Governor were not preloaded for candidates who were
registered at the sample address or county of sample address.

# V162034a  Numeric   POST: For whom did R vote for President

Questionnaire: POSTVOTE_PRESVTWHO

*IF R DID NOT INDICATE IN THE PRE THAT R ALREADY VOTED:*
*IF R IS REGISTERED TO VOTE:*
*IF R REPORTED IN THE POST THAT R VOTED:*
*IF R VOTED FOR PRESIDENT:*
*IF R ASSIGNED TO DEMOCRATIC NAMES FIRST /*
*IF IF R ASSIGNED TO REPUBLICAN NAMES FIRST:*

*Who did you vote for? [ Hillary Clintonpo, Donald Trumppo / Donald Trumppo,*
*Hillary Clintonpo], Gary Johnsonpo, Jill Steinpo , or someone else?*

The order of major party Presidential candidate names was assigned
according to the same value used for the order of Democratic and
Republican U.S. House, U.S. Senate, and governor candidate names.
This value also determined, for face-to-race respondents, the color
of the Ballot Card, if used (yellow if Democratic candidate names
first, green if Republican candidate names first).

## V162037a   Numeric   POST: Preference for Pres cand (did not vote)

Questionnaire: POSTVOTE_PREFPRWHO

*IF R DID NOT INDICATE IN THE PRE THAT R ALREADY VOTED:*
*IF R IS NOT REGISTERED   OR IF R IS REGISTERED TO VOTE AND DID NOT VOTE:*
*IF R PREFERRED A PRESIDENTIAL CANDIDATE:*

*Who did you prefer? [ Hillary Clintonpo, Donald Trumppo / Donald Trumppo,*
*Hillary Clintonpo], Gary Johnsonpo, Jill Steinpo , or someone else?*

The order of major party Presidential candidate names was assigned
according to the same value used for the order of Democratic and
Republican U.S. House, U.S. Senate, and governor candidate names.
This value also determined, for face-to-race respondents, the color
of the Ballot Card, if used (yellow if Democratic candidate names
first, green if Republican candidate names first).

## V162039  Numeric  POST: Did R vote for U.S. House of Representatives

Questionnaire: POSTVOTE_VOTEHS

*IF R DID NOT INDICATE IN THE PRE THAT R ALREADY VOTED:*
*IF R IS REGISTERED TO VOTE:*
*IF R REPORTED IN THE POST THAT R VOTED:*
*IF IWR HAS BALLOT CARD FOR REGISTRATION DISTRICT/*
*IF IWR DOES NOT HAVE CARD FOR REGISTRATION DISTRICT:*

*[Here is a list of candidates for the major races in this district.*
*How about the election for the House of Representatives in Washington.*
*Did you vote for a candidate for the U.S. House of Representatives?*
*/*
*How about the election for the House of Representatives in*
*Washington. Did you vote for a candidate for the U.S. House of*
*Representatives?]*

*[SHOW [YELLOW/GREEN] BALLOT CARD/}*
*DO NOT SHOW BALLOT CARD]*

In face-to-face mode, the text 'Here is a list of candidates for the major races in this district' was omitted if the Ballot Card was not used. For Web administration the text was omitted.
'Yellow' ballot card assignment indicated that names of Democratic candidates were included before names of Republican candidate names for vote section questions that list candidate names and, in face-to-face mode, for the order of names listed on the Ballot Cards.
'Green' was assigned for display of Republican candidate names first.

*IF R VOTED FOR U.S. HOUSE OF REPRESENTATIVES:*
*IF IWR HAS BALLOT CARD FOR REGISTRATION DISTRICT:*

*Who did you vote for?*

*FOR CODE 4 PLEASE RECORD RELEVANT COMMENTS IN COMMENT BOX*

In the vote section, 'Yellow' ballot card assignment indicated
listing of Democratic candidate names first onscreen (both modes)
and on face-to-face Ballot cards, 'green' ballot card assignment
indicated listing of Republican candidate names first.
For Web administration response option 4 was not included.

*How about the election for the House of Representatives in*
*Washington? Did you prefer one of the candidates for the U.S.*
*House of Representatives?]*

*[SHOW [YELLOW/GREEN] BALLOT CARD/}*
*DO NOT SHOW BALLOT CARD]*

In face-to-face mode, the text 'Here is a list of candidates for the
major races in this district' was omitted if the Ballot Card was not
used. For Web administration the text was omitted.
'Yellow' ballot card assignment indicated that names of Democratic
candidates were included before names of Republican candidate names
for vote section questions that list candidate names and, in face-to-face
mode, for the order of names listed on the Ballot Cards.
'Green' was assigned for display of Republican candidate
names first.

## V162056   Numeric   POST: Whom does R prefer for governor (ballot card)

Questionnaire:  POSTVOTE_GOVPREFBC

*IF R DID NOT INDICATE IN THE PRE THAT R ALREADY VOTED:*
*IF R IS NOT REGISTERED TO VOTE OR IF R IS REGISTERED AND R DID NOT VOTE:*
*IF A GUBERNATORIAL RACE WAS HELD IN REGISTRATION STATE:*
*IF R PREFERRED A GUBERNATORIAL CANDIDATE:*
*IF IWR HAS BALLOT CARD FOR REGISTRATION DISTRICT*

*Who did you prefer?*

In the vote section, 'Yellow' ballot card assignment indicated
listing of Democratic candidate names first onscreen (both modes)
and on face-to-face Ballot cards, 'green' ballot card assignment
indicated listing of Republican candidate names first.

# V162154a    Numeric    POST: How much U.S. support Israel in conflict w/Palestinians [ISR 1st]

Questionnaire: ISRSUPP_AMT1ISR

*IF R IS SELECTED FOR ISRAEL SUPPORT QUESTION FIRST:*

*Please turn to page [PRELOAD: page] of the booklet.*

*In the conflict between Israelis and Palestinians, how much should
the United States support the Israelis? [A great deal, a lot, a moderate
amount, a little, or not at all / Not at all, a little, a moderate amount, a lot,
or a great deal]?*

Respondents were randomly assigned to be asked about Israeli support or
Palestinian support first.
For Web administration, reference to the respondent booklet was omitted.

RANDOMIZATION: Assignment to Israel-Palestinian support questions version 1A or 1B

## V162183  Numeric  POST: Govt bigger because too involved OR bigger problems

Questionnaire: LIMTGOV_GOVBIG

*One, the main reason government has become bigger over the years is*
*because it has gotten involved in things that people should do for themselves,*
*or:*
*Two, government has become bigger because the problems we face*
*have become bigger.*

*IF NECESSARY, PROBE 'WHICH IS CLOSER'*

For Web administration, the question text was displayed as follows
and the numbered response options were labeled as in the question text:
Which of the two statements comes closer to your view?
  1. The main reason government has become bigger over
     the years is because it has gotten involved in things that
     people should do for themselves.
  2. Government has become bigger because the problems we face
     have become bigger.

## V162283    Numeric    POST: CSES: 10pt scale: like-dislike Democratic Party

Questionnaire: CSES5_LDDEMPTY

*Please turn to page [PRELOAD: page] of the booklet.*

*I'd like to know what you think about each of our political parties.*
*After I read the name of a political party, please rate it on a scale from 0 to 10,*
*where 0 means you strongly dislike that party and 10 means that you strongly*
*like that party. If I come to a party you haven't heard of or you feel you do not*
*know enough about, just say so.*
*The first party is:*
*the Democratic Party*

*DO NOT PROBE DON'T KNOW*

For Web administration, reference to the respondent booklet was omitted
and the question read: We'd like to know what you think about each
of our political parties.  Using the scale below, please rate it on a
scale from 0 to 10, where 0 means you strongly dislike that party and 10
means that you strongly like that party.  If we come to a party you
haven't heard of, you don't need to rte that person.  Just click Next
and we'll move on to the next one.

## V162371b   Numeric    POST: FTF CASI/WEB: WEB ONLY: Facebook login reconsider

Questionnaire: FACEBOOK_LOGINPLEA

*IF MODE IS WEB:*
*IF R HAS A FACEBOOK ACCOUNT THAT R HAS USED IN THE PAST MONTH:*
*IF R DID NOT LOG INTO FACEBOOK:*

*We understand it is your choice not to share information about how you've used Facebook.*

*Would you be willing to reconsider? To get an accurate picture of how all Americans use -- or do not use – Facebook, we need to include you.*

*Any information you do share through Facebook would be stored separately from the rest of your survey responses. We would use the information to look at things like how many news stories about the presidential election appeared in people's Facebook feeds, and how many posts with references to political candidates they liked, and other general descriptions of Facebook feeds and profiles. And we would keep the information confidential.*

*If you will log into Facebook, below, you can tell Facebook what information you are willing to give to Stanford University and the University of Michigan, or you can decide not to share anything.*

*[BIG BUTTON: Log into Facebook]*
*[SMALLER BUTTON: Decline]*
